

## MAY NEWSLETTER

In language arts, we are working to publish our poetry collections. When this is complete, we will undertake our final novel study of the year.

In math we will have our division unit test on Friday, May 8. The next unit will be fractions and decimals. Students will continue to work on basic facts with all 4 operations.

In science, we are continuing with our study of weather. We will overlap this with our wetland unit by the end of May. We are in need of many parent volunteers for our wetland field trips – May 28 (all day) and June 2, 10, and 18 in the afternoon.

In social studies we are well underway with the geographic regions of Canada. Students are rotating through a number of activities for each of the six regions.

In music, we had our African drum residency the week of April 20 - 24. The grade 4 and 5 students enjoyed this experience! By the end of May, we will have had an introduction to band instruments and a screening with Ms. Rowe. Look for information to be coming home later in May about Grade 6 music opportunities.

We have a busy two months ahead!
